

# 100 ROKOV SŠZ C 29. 6. 2024 \* \* \* \* \* ŠTÚDIE

Predbežný výsledok skladateľskej súťaže rozhodca: Péter Gyarmati (Maďarsko)

I thank the Slovak Chess Federation and personally Ľuboš Kekely for inviting me to judge the tournament.

34 entries were received, 7 of which were joint-compositions. The works come from 26 authors from 13 countries.

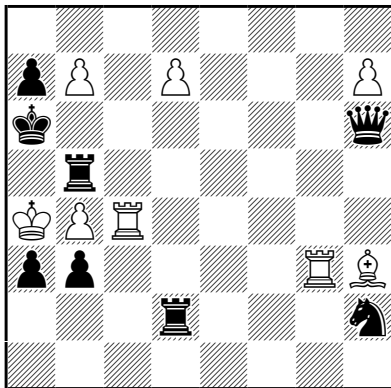

The average quality of the works was high. In fact, each of them has value that deserves a ranking. This time, I treated anticipation as a priority. One study (S.Nosek) completely anticipated, so this work was eliminated from the tourney. I didn't not award partially anticipated studies. I gave a lower ranking to works that use a known idea in a key position. The next important aspect is the clarity of the analysis. If one of the versions ends in such a way that a solver with average playing power would not be able to reach the trivial finishing position, I left that study out of the award. There are several monumental works in the tender material. For these, I considered it an advantage if there is a significant connection between the different parts. I refer to this in the individual studies. From a formal point of view, I considered the non-playing pieces and the check-capture sequences to be a disadvantage. Of course, one cannot abstract from the amount of artistic moments displayed, they increase the value of the work to a greater or lesser extent. Taking on a bigger task is appreciated.

Accordingly, my ranking is as follows:

Black's two knight sacrifices are countered by two white rook sacrifices, culminating in an ideal mate with active self-block... (author). As the author indicates, this study uses the ending mate picture of Gunter Sonntag's 1971 work. However, the game leading up to it is brilliant. We see spectacular sacrifices, very beautiful quiet moves. The sidelines are interesting too, but not complicated.

If you see this study for the first time, you may be impressed. But let's just look at the end! Here is one of Korányi's sketches, which I published in Sakkélet in 1998 after his death. Of course, you can't get to know all the studies, but the ending is an anticipation. My other problem was that the game is very hard, check-captures and repeat. 9. ♖ff4!! very nice move.

 or 17...h2 **stalemate**. A nice, practical game-like study. There are two phases here. In  
 the first phase, in addition to the pin-unpin moves, a nice move is 2.e6! and the small  
 side line 2.d7? where black can use his battery. The second part has little material, but  
 the precise playing is aesthetic. The end of the game is a positional draw or stalemate.
